

Bathing Inspiration

Roca

Create your perfect wellness retreat with Roca's composite baths, crafted from high-quality materials in a variety of styles and sizes.

Stonex® is a composite material inspired by nature, with a comfortable texture of stone and a high gloss finish.

Surfex® is a revolutionary, solid surface material, with a soft, matt texture.

Both materials are warm to the touch, meaning you can really relax and unwind.

Choose a composite bath to provide a statement piece in your bathroom. The range includes freestanding, corner and drop-in options.

Stonex® - High-quality resin

The Stonex® material, made up of a selection of high-quality resins and mineral particles, achieves a smooth gloss finish during the production process, but with excellent anti-slip properties to ensure maximum safety while bathing.

Its colour remains intact over time and does not discolour from exposure to UV light. It is extremely durable, with high resistance to wear and tear including scratches and abrasions.

Surfex® - Design through innovation

Roca's commitment to innovation and design has led to the creation of Surfex® which is a revolutionary material, made from a combination of organic minerals and resins. Surfex® is an exclusive formulation to Roca and is changing the way we design our bathrooms. It's now possible to create curves, straight lines and super defined angles with no joints thanks to a compound that enables us to develop designs that up until now we could only imagine.

Contemporary freestanding bath made from our exclusive Stonex® formulation which uses a selection of high-quality resins and minerals.
