

The Radiator Company

The Radiator Company offers the UK's largest selection of both hydronic and electric designer radiators and towel rails. Established in the UK for over 25 years we are a brand of Italy's leading manufacturer of design led radiators.

As a leader in home heating solutions, we have developed our range to offer the widest choice of designs and colours as well as technology to maximise efficiency. This includes an extensive selection of designer electric models. An electric radiator is an ideal solution to heat rooms where there are no options to install a standard central heating system or where adding to an existing system would be costly or difficult to achieve.

Design

- Over 25 exclusive designs
- Over 200 colours and special finishes
- Designs include Steel Multi Column, Aluminium and Cast Iron
- Italian design & manufacture

Choice

- UK's largest offering of radiators and towel rails, please visit theradiatorcompany.co.uk to view the complete range
- Stocked sizes delivered in 48-72 hours
- Made to Order options in over 200 colours and special finishes

Service

- A dedicated UK Customer Service Team to make your purchase as smooth as possible
- Order from our network of Electric or Plumbing and Heating Merchants
- Over 500 Showrooms nationwide
- Free Delivery on all radiators and towel rails to UK mainland Showrooms and Merchants
- Minimum 10-Year Guarantee on all radiator and towel rails, minimum 2 years on all elements
- Radiators & towel rails are CE/UKCA approved & appropriately certified to EcoDesign/Lot 20/NF standards

IRSAP UK are proud members of MARC, for more information marc.uk.com

The Radiator Company is a brand of **IRSAP**, Italy's leading manufacturer of design led radiators.

Welcome to The Electric Collection

Our Electric Collection has been created to provide a choice to those customers who are looking for exciting designs and colour choices to match those available on wet systems, in addition to the energy-efficiency and flexibility of electric. Designs and colour options are available to suit every home from contemporary to historical and traditional.

Ceramica Electric

High quality Italian design & manufacture.

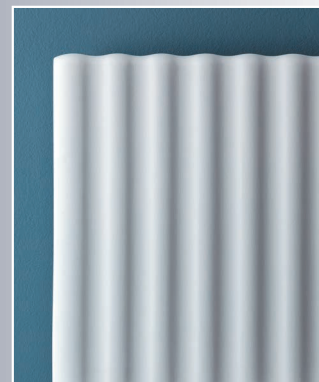

EcoDesign / Lot 20 Compliant.

Recycled Marble radiant panels

10 year guarantee on radiators. 2 year guarantee on elements.

White finish only; choose from 3 different models - Varenna, Pavia or Senso

Made to Order: Up to 6 weeks

With three unique surfaces to choose from, the Ceramica range lets you make a contemporary statement unique to you. Comes equipped with a fully programmable digital display that offers a range of different modes.

Three unique surfaces

- Senso - simple and plain, a lightly textured effect creating a subtle statement.
- Varenna- a sense of movement created by the interaction of light and shade across the soft lines and gentle curves of the design.
- Pavia - a natural stone effect finish with a strong bold impact.

Ledbury & Henley Cast Iron Colours & Finishes

10 Classic Cast Iron Colours

Our range of classic cast iron colours are specially selected colours reflect the heritage and traditions of cast iron from Victorian times to the modern day. Chosen with an eye on classic interiors these tough, hard wearing & washable finishes add a stunning metallic look to your cast iron radiators. Our selection of darker colours such as Iron Ore, Lead Grey and Factory Black, are amongst the most popular choices along with the deep dark bronze of Vintage Coin and Classic Bronze. The range of Gold's & Copper are perfect for a more rich and bold statement. The finish of the durable polyurethane wet paint is equivalent to an Eggshell, which sits well on the rough texture of cast iron. For samples please call **01342 302250**.

188 RAL Colours

Our Ledbury and Henley Electric cast iron designs are available in wide selection of 188 internationally recognised RAL colours. Colour can add an extra element of individual style and design, creating a personal and unique result.

For a RAL chart please call **01342 302250**.

RAL 1015 - Light Ivory

RAL 6013 - Reed Green

RAL 1013 - Oyster White

Burnished & Industrial Finishes

Our Henley and Ledbury are both available in beautiful burnished and industrial finishes. The Burnished finish is achieved via tumbling the sections in a ceramic media, and then lightly buffing the sections on a polishing wheel.

The Industrial finish is achieved by tumbling the sections in this same ceramic media, but then left unlaquered for a short while to patina, before we lacquer the sections to seal the finish.

Choose Cable Colour

Our standard cable colour is white. You can select either light grey or black, which could extend your lead time by up to 3 weeks.

Branded Paints

We are able to offer our Ledbury and Henley Electric cast iron in any one of Farrow & Ball's® or Little Greene's® stunning range of quality paints, a perfect match for any heritage property. They add a classic high quality finish to your radiator that will perfectly match your chosen colour. We only use genuine Farrow & Ball® or Little Greene® paints. For Farrow & Ball® we use their Estate Eggshell (20% sheen), and for Little Greene®, we use their Tom's Oil Eggshell (15% gloss).

The process is very straightforward, simply specify the colour name and reference number along with the radiator range and size and we will provide you with a quotation. Once approved we will order the paint and produce your radiators.

Please do note that (especially with Little Greene®) the reference number is extremely important. Little Greene's palette of 196 colours includes the 'Colour Scales' which offer graduated shades from the same family of pigments. Therefore, similar names have been given, with a colour number for each.

Prices and lead times are available on application (please call 01342 302250 for more details).

Towel Bars

Towel bars can be positioned at various different locations as shown on the drawing below.

- Electric radiating panel
- Wireless digital electronic control featuring weekly program. 30-50 metre range (868 MHz)
- Open window detection function
- IP Rating - IP44. IEC Class Protection - Class II.
- Cable length 1200mm, lower left side cable outlet
- Integrated Wireless receiver with 2 LED's to signal the function mode
- Programmable wireless digital transmitter

Wireless digital controller

Relax Bagno Electric, 1963mm x 616mm in White RAL 9016

Step Electric

High quality Italian design & manufacture. EcoDesign / Lot20 Compliant.
Aluminium: electric vertical ladder rail
10 year guarantee on towel rail. 2 year guarantee on element.

Pearl White finish only

Made to Order: Up to 5 weeks

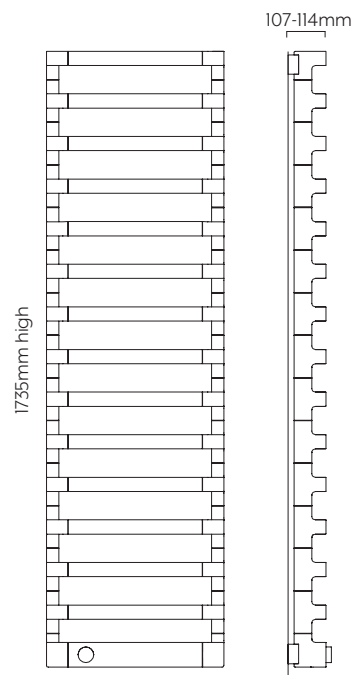

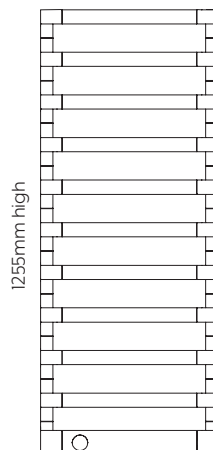

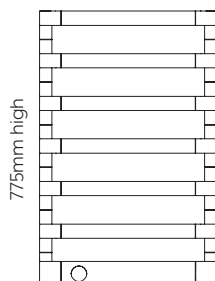

The elegant chromatic interface applied to the temperature adjustment permits the temperature to be set in the range of 7°C to 31°C by varying the colour scale from dark blue to bright red. The Step Electric is equipped with a booster function that delivers maximum power for a determined time (2 hours). Remote controlled via infrared for weekly programming and other modes (night, antifreeze, etc).

Element Remote Controller included

- Flat fronted tubes in aluminium, 40mm height
- Supplied with Infrared remote control
- IP Rating - IP24. IEC Class Protection - Class II.
- Long electricity cable: 1200mm, lower right side cable outlet
- Wall fixing systems the same finish as the radiator

Step Electric 1255mm x 500mm in Pearl White

Chalfont Electric

High quality design & manufacture.

Floor Standing: Brass tubes with a steel sectional radiator

Wall Hung: Brass tubed wall hung design

10 year guarantee on towel rail. 2 year guarantee on element.

Floor Standing: Chrome with White Steel Radiator

Wall Hung: Chrome or Bright Nickel finishes

Delivered in up to 10 weeks

Simple
Element

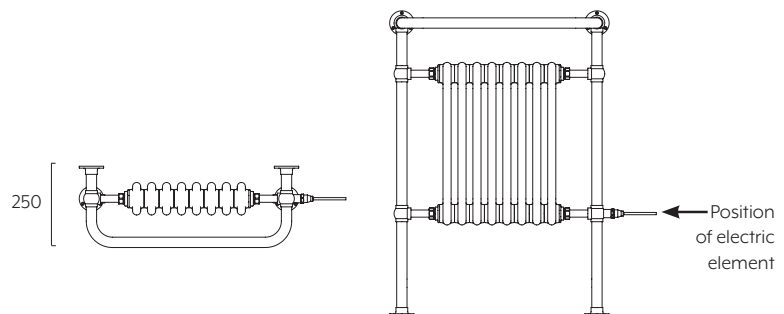

A traditional design, the Chalfont has both wall and floor mounted options. The classic ball joint detail and white Ancona multicolumn insert on the floor mounted version provide a touch of Victorian style. Supplied with a simple element to be connected to your choice of fused spur.

Heating Elements & Dual Fuel Kits

All available from stock and delivered in 48-72 hours.

Adding an electric element (normally to a towel rail) is an excellent way to make the most of an existing central heating system during the summer, allowing you to warm towels when the heating is turned off.

You will need a suitably sized element, with either a T-Piece to adapt the pipe centres or a specifically designed set of valves that will accommodate an element and pipes without the need to change the position of the pipes.

Most towel rails are installed as part of a standard central heating system, but this means they will be cold when the heating is turned off in summer. With a dual fuel option, you can have the best of both worlds. Using a special valve connection, an electric element can be added to your towel rail to enable you to use your towel rail and keep your towels warm in the summer without having to turn on the heating.

Standard manual valve with no electric element

Dual Fuel Valve

Valve & additional T-piece

Please scan the QR code (shown below) to view our hydronic brochure or call **01342 302250** and our customer service team will send a copy out in the post to you.

www.theradiatorcompany.co.uk/brochure

Follow these simple stages to select the correct Dual Fuel Kit for your towel rail.

1. Valve Configurations

All radiators will require a valve, select either a T-piece or a Dual Fuel valve to suit your installation.

2. Types of Element

There are two types of electric elements to choose from (see below and opposite).

3. How to choose your Element

It is important to select the correct size element for your towel rail. Too small and it will not provide enough heat, too large and it can burn out. The chart above right that shows the towel rail output in watts and the corresponding recommended size of element.

Towel Rail output range in Watts	Electric Elements
165 - 255	200w
260 - 375	300w
380 - 530	400w
535 - 735	600w
740 - 920	800w
920 - 1100	1000w

Digital Square Element

- 30 Heat settings from 30°C to 60°C in steps of 1°C. Regulates the internal temperature and displays this on screen.
- Daily 24hr timer. 0.5 to 4hr drying function.
- 4x Buttons: Dryer, Power, Temp +/-.
- Frost & overheating protection.
- IPx5. Class I. Guarantee - 2 years
- Delivered in 48-72 hours

Chrome + Grey Cable

White + White Cable

Delivered in 48-72 hours

Heating Elements & Dual Fuel Kits

All available from stock and delivered in 48-72 hours.

Low Temperature 43D Element

- Element pre-programmed to run at an internal temperature of 43°C, for Low Surface Temperature (LST) style operation*
- When specifying this element, to help ensure correct surface temperature, reduce the output of your radiator (as water) by 40% (i.e for a 200w towel rail install the 120w element)
- No Timer. 2 hour drying function
- Frost & overheating protection
- IPx5. Class 1.
- Guarantee - 2 years
- Delivered in 48-72 hours

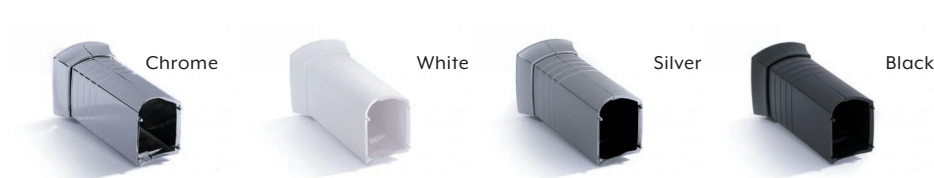

Silver + Grey Cable

Description	Model	Output	IP Rating	Silver Ex VAT	Silver Inc VAT
Low Temperature 43D Element	LT43ELE	120, 200, 300, 400, 600 & 1000 watts	IPx5	£149.00	£178.80

*Note: Small areas of the towel rail could exceed 43° by a marginal amount during the initial heating up process

Matt Silver T-Piece (for Dual Fuel)	AATPIECES	£13.00	£15.60
Chrome T-Piece (for Dual Fuel)	AATPIECEC	£16.00	£19.20

Our Radiators & towel rails are CE/UKCA approved & appropriately certified to EcoDesign/Lot 20/NF standards

Made to Order

We pride ourselves on having the widest range of sizes, options, colours, and accessories so that you have literally thousands of options to choose from. This means that you can have almost any radiator made to order so that it perfectly suits the space you have available, your interior design and also match your heat requirements.

Colour Options

Many of our designs are available in a large selection of RAL colours (188 internationally recognised paint colours) and Special Finishes. Please be aware that certain RAL colours are subject to availability and if there are any issues with supply we will contact you to discuss alternatives. If you would like a copy of our RAL or Special Finish chart please contact us on 01342 302250. Please note that due to the printing process and manufacturing tolerances, the colour (including white) of a finished radiator may vary slightly from the colours represented in the brochure and from one colour group to another, as well as from our Special Finish & RAL charts. It should also be noted that if the same type of radiators are ordered and produced, they may also differ in finished colour from any previously ordered.

How much heat?

We always recommend you choose radiators with a higher output than required, as you can always turn them down & have the reassurance of additional heat in really cold spells.

How is heat output measured?

There are two recognised measurements for heat output; BTU's (British Thermal Unit) and Watts. As this brochure is offering Electric only products you will find Watts listed in the pricing table by each radiator or towel rail.

How can I find out what heat outputs I need?

Your installer should be able to confirm the exact requirements for each of your rooms, but you can also visit our website (theradiatorcompany.co.uk) and use our online heat calculator or use the following simple calculation as a guide;

Find the volume of your room in cubic feet = height x width x length (To convert cubic metres into cubic feet multiply the total figure by 35.31).

For example:

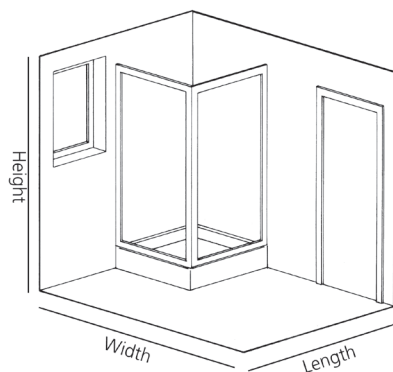

A bathroom 6'x8' with 8' ceilings = 625 Watts

You may need more than 1 radiator in order to ensure an even distribution of heat in a large room, if so divide the required output by the total number of radiators you could sensibly place in the room.

e.g. a lounge 14' x 18' x 8' ceilings = 3350 Watts

Two radiators would require an output of = 1675 Watts each,

3 radiators = 1116 Watts each

Stock

To provide the best possible service, we hold the most popular sizes of white and chrome models in stock. So if you need quick delivery, look in the technical details for models listed with **bold** prices; these can usually be delivered within 48-72 hours.

Finishes and Painted Cast Iron

It should be noted that due to the production process colours can vary by +/- 5 to 10% from samples provided and between radiators ordered in the same colour at different times. All painted cast iron radiators will be checked and tested prior to despatch. Care must be taken when handling painted cast iron radiators on-site to avoid damaging the finish. Cast iron radiators will be supplied with a small bottle of touch up paint in case of damage to the finish during installation, however, it should be noted that this may vary slightly from the original finish. As a result of the casting process, cast iron radiators have a rough surface finish with small imperfections which will show after the painting process.

Safety Instructions

The radiator must be installed by a qualified electrician in compliance with the standards in force.

Always fix the heated Towel Rail to the wall as per the assembly instructions provided with each electric product.

When installing the towel rail the IEC 60364-7-701 according to the edition in force must be complied.

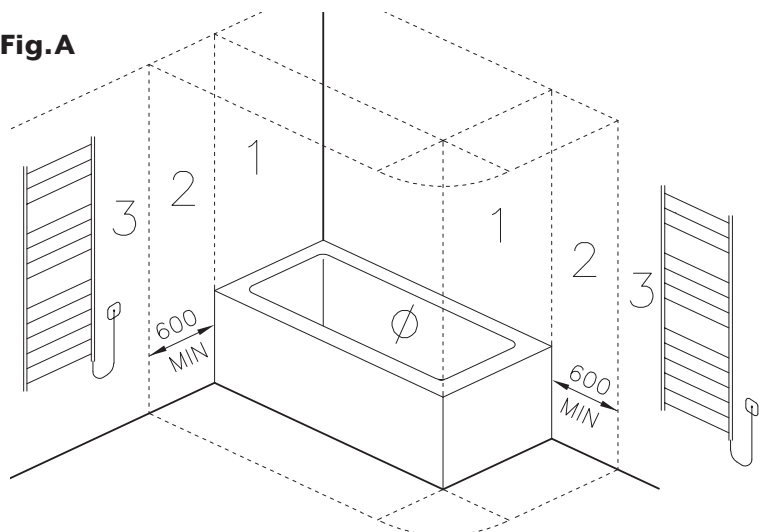

To supply the towel rail, an omnipolar switch, with at least 3 mm of distance between contacts, must be employed.

When installing in bathrooms or in shower-rooms, the appliance should be installed in such a way to avoid the switch and other controls to be reached by people using the bath or the shower. (see **Fig. A**)

The radiator must not be installed immediately beneath a fixed current outlet.

Take utmost care while installing the Towel Rail to avoid damaging the electronic thermostat and the connecting cable.

Fig.A

In order to reduce risk to children, we recommend installing the device in such way that the lowest heating pipe is at least 600mm above the ground.

Order your radiator in six easy steps

- 1. Confirm your heat output requirements for the room where you need the radiator or towel rail;** this ensures the radiators you choose will deliver the heat output you need. Use the heat output calculator on our website **theradiatorcompany.co.uk** then decide how many radiators you need for the relevant room; discuss this and positions with your installer if needed.
- 2. Choose your design;** our range has everything from traditional cast iron to modern feature radiators, even an environmentally friendly aluminium range, with an extensive choice of sizes, colours & outputs.
- 3. Select a size that matches the heat output requirement;** outputs are shown in the pricing tables & will help you & your installer to find the best match for your needs.
- 4. Choose the colour you want;** with over 200 colours & special finishes you are able to match your colour scheme or introduce an accent colour to create a striking feature.
- 5. Order from your nearest showroom or merchant** to find your nearest branch call us on **01342 302250** or visit **theradiatorcompany.co.uk**
- 6. Order online from our website theradiatorcompany.co.uk**

Delivery

Please note that many of our factories close for 2-4 weeks during the holiday periods of July/August and December. This may extend the delivery period quoted for non stock made to order items ordered during July/August & December/January. We will confirm the expected delivery date on our order acknowledgement at the time of order. **Unfortunately, delivery to Scotland / Offshore Islands may take longer due to the distances involved.** Deliveries will be made to the nearest hard standing area.

Terms & Conditions

For a copy of The Radiator Company full Terms & Conditions please call our Customer Services department on **01342 302250** or visit **theradiatorcompany.co.uk**
